California ISO
Shaping a Renewed Future

Request for Renewable Integration Study

As the ISO considers and prioritizes the renewable integrations study work that will occur between now and the end of 2011, the ISO is seeking input what work stakeholders feel provides the most value in informing the process with regards to operational requirements and needs. The requests will be evaluated by the ISO in collaboration with an advisory team to prioritize the study work.

1. **Describe the requested study work:**

2. **Describe whether the requested work to:**

    a. **Informing the bound of resource need (specify whether the proposed work informs the upward or downward bound of need, or both);**

    b. **Informing the amount and operating characteristic of generic resources (supply or demand-side resources) able to meet the identified need;**

    c. **Simplifying and/or providing transparency to the methodology such that the results are more easily understood.**

SB_GT&S_0234639

3. **Describe the methodology and analytical steps needed to perform the proposed work**

4. **Identify whether you have the capability of performing any of the proposed study work.**

5. **Explain whether the proposed work can be accomplished by the end of 2011. Explain whether and how the results from the proposed work interact with Steps 1, 2 or 3 of the methodology previously used by CAISO or the IOUs in the LTPP filing.**
