

SoCalGas MEMO

March 19, 2020

From: Paul Goldstein, COVID-19 ICS Response Team Operations Chief

To: All CS Field, GOS, M&R, Transmission, and Storage Employees

Re: Two-Person Vehicle Guidance

In response to COVID-19, SoCalGas has been evaluating our workforce needs and actively supporting the health and safety of our employees, including implementing social-distancing practices at our facilities, including fleet vehicles.

As part of these efforts, we have consulted with an epidemiologist who has advised that it is safe for a 2-person crew to continue traveling in the same vehicle as long as the employees continue to practice proper personal hygiene including washing hands, using hand sanitizer and maintaining a clean vehicle.

In the event that an employee who rides in two-person crews have questions or concerns, please let your supervisor ASAP.

As always thank you for your continued support.
