Generating Asset Owners
(See Attached List)

August 28, 2006

SUBJECT: General Order 167 – Maintenance Plan Summary and Recertification for Compliance with the Maintenance Standards and Logbook Verified Statement

To Generating Asset Owners:

Pursuant to Section 7.3 of General Order 167, I specify the contents and format for the Maintenance Plan Summary (Plan) in the attached document. Please note that an updated Maintenance Matrix (like the one we required for filing two years ago) can substitute for Part 2 of the Plan, provided that you include a brief description of each of the documents referenced in the matrix as required by the Plan. Please file your Plan for each generation unit with the Consumer Protection and Safety Division by emailing it to maintenanceplansummary@cpuc.ca.gov, by December 1, 2006.

In addition, I would like to remind you that two additional documents are due December 1, 2006 for each power plant unit: first, your Recertification for Compliance with the Maintenance Standards and second, a Verified Statement of compliance with logbook standards for thermal and hydroelectric facilities. Please file your Recertification for Compliance with the Maintenance Standards to Maintcertfiling@cpuc.ca.gov, and Logbook Verified Statement to Thermallogverfiling@cpuc.ca.gov (for thermal facilities) or Hydrologverfiling@cpuc.ca.gov (for hydroelectric facilities).

The template and instructions for these filings can be found at <http://www.cpuc.ca.gov/powerplantstandards>. If you have any questions or comments, contact Mark Ziering at 415-703-2233 or email maz@cpuc.ca.gov.

Sincerely,

A handwritten signature in black ink that reads "Paul Larson FOR". The signature is written in a cursive style.

Steve Larson
Executive Director
California Public Utilities Commission
