This image presents a **Visual Simulation** of the proposed Project from **KOP 6** on westbound State Route 79 (Winchester Road), approximately 0.23 mile northwest of the intersection with Max Gillis Boulevard. This simulation illustrates the replacement and extension of the existing wood-pole utility line with a new wood-pole subtransmission line that would be noticeably taller than the existing line. Structure skylining (extending above the horizon) and view blockage of the background sky would noticeably increase.
