

This image presents the **Existing View** to the east from **KOP 2** on eastbound **Domenigoni Parkway**, just west of Leon Road. This view across a portion of Domenigoni Valley encompasses a predominantly rural, undeveloped valley landscape containing the curvilinear form of the parkway bordered by rocky ridges and hills. The dominant landscape feature in views to the east is the massive, angular form of the San Jacinto Mountains. An existing wood-pole line along Leon Road is visible in the center of the image.
