BY:.....

Sept 1, 2006  
I just read the Mountain  
Yodeler article about your  
proposed power lines crossing  
Leona Valley.  
I can't believe that you're  
even considering destroying  
our little valley with those  
ugly electric power lines.  
In the 1st place there are  
already power lines a few  
miles down the road that  
cross Elizabeth Lake Rd just  
before 25th St. West. Those  
have been there for years.  
That way you don't need to  
displace people from their  
homes. Just put yourselves  
in their place. Please  
do not pass alternative #5  
sincerely  
Nubia Hulse

## Response to Comment Set C.39: Nubia Hulse

- C.39-1 Thank you for submitting your opinion on the Project.
- C.39-2 In identifying the need for the Project, SCE determined that the existing transmission system does not have the necessary capacity to import new power generated in the Tehachapi Wind Resource Area; therefore, the existing power lines which cross Elizabeth Lake Road near 25th Street West cannot be used as an alternative to the proposed Project.
- C.39-3 Your concern will be shared with the decision-makers who are reviewing the Project and alternatives at the USDA Forest Service and the CPUC. Please also see the response to Comment C.13-1.
