Subject: Extension of Public Comment Period for Antelope-Pardee 500kv
Transmission Project

Dear Ms. Noiron:

I am writing to you, Ms Noiron, as supervisor for Angeles National Forest, to request an extension of the public comment period for the Antelope-Pardee 500kv Transmission Project. Public comment is scheduled to close September 18, 2006. The communities of Agua Dulce and Leona Valley were not included in the original scoping process. Alternate 5 of the EIR/EIS directly affects those 2 communities. Having attended the public meeting held last night in Agua Dulce, the message came through loud and clear that lack of notice of the project and alternate routes is a real problem. Most attendees at the meeting were notified by friends and neighbors, not by the project managers or Aspen Environmental, the company who prepared the Draft EIR/EIS.

C.26-1

Based on the voluminous documents and the complexity of the issues, I am requesting a 90 day extension of the Public Comment period to extend to December 18, 2006.

Please let me know the status of my request.

Thank you.

Mary Johnson
