Dear Sirs,

I am writing in protest to the above-proposed routes for the Transmission Project. These alternatives would negatively impact my home, especially the pink route, which will be between 500 and 800 yards from my home.

1. Loss of property value
2. Cause many fires due to birds and lightning sparking the wires
3. High Voltage in High Fire Areas, not a good idea.
4. Limited access roads are all dead ends, hazardous during emergencies.
5. Eye and noise pollution, constant buzzing
6. Electromagnetic fields, and Radons, affecting the health of people within 1 mile, Me!
7. Harm to the Red Tailed Hawks on my property, and surrounding areas
8. The same habitat the Forestry is trying to protect, is not important on our properties?
9. Inefficiency of route, loss of power over the longer distance, will consume more than 3 times the land of the forest route.
10. Conflicts with recreation, including the Pacific Crest Trail

C.188-1

Sincerely,

James Lewandowski

Response to Comment Set C.188: James P. Lewandowski

C.188-1 Thank you for your opinion regarding Alternative 5. Your concerns will be shared with the decision-makers who are reviewing the proposed Project and alternatives at the USDA Forest Service and the CPUC.
