**Subject:** 500-kV transmission project

September 13, 2006

We the residents of Leona Valley feel that the project planners and all agencies involved did not allow us fair amount of time and insufficient notice for public comment and educated decision about potential health & safety risks, possible loss of land & homes.

No one can read the map that is posted on their web site because it is not clear. The initial route proposed by Edison in December 2004, following the existing utility corridor thereby causing the least impact to all residents

We request another public hearing concerning all parties involved before the CPUC can approve this project.

C.82-1

## **Response to Comment Set C.82: Damie Poonosamy**

- C.82-1 Please see General Response GR-5 regarding noticing procedures and the review period for the Draft EIR/EIS. On September 13, the CPUC, as the CEQA Lead Agency, and the USDA Forest Service, as the NEPA Lead Agency, extended the public review period for the Project from 45 days to 60 days, now ending on October 3, 2006.
