Subject: Overhead power lines

My opinion is that the proposed power lines through the Sun Lakes community be placed underground. We are a large community and have contributed much to our surrounding neighbors over the years. It would be nice if our expressed concerns to protect our property values and maintain our natural surroundings were to be taken seriously by those who plan and are responsible for providing additional power to distant communities.

I understand that our board has taken a neutral position on this debate, but that position is the position of a "lawyer mentality" and not the general posture of community members.

C31-1

Start the year off right. [Easy ways to stay in shape](#) in the new year.

Responses to Comment Set C31 – Gary Laba

- C31-1** Your support for the Partial Underground Alternative has been noted. The Environmentally Superior Alternative has been re-evaluated and is identified in the Recirculated Draft EIR, Section E (July 2008) as the Proposed Project. Please see General Response GR-1 for a discussion regarding the change in determination of the Environmentally Superior Alternative. Please also see original Draft EIR (December 2007) Section F.2.2 (Property Values).
