

AIR QUALITY ANALYSIS METHODOLOGY

Purpose

The purpose of this document is to describe the methodology used to analyze the potential air quality impacts of the proposed project. The analysis allows a conclusion to be reached about the possible significant

- hours worked per day
-

The land use category for each site was established based on observations made during the site

- Increasing the insulating and/or transmission loss properties of the enclosures to be used on the generators will result in lower sound levels

**CALCULATION OF COMBINED EXHAUST AND MECHANICAL
NOISE FOR EACH GENERATOR WITHOUT NOISE ATTENUATION**
