

Source: Sunrise DEIR/DEIS, 2008

The **existing view** to the northeast from Ortega Highway up Decker Canyon toward South Main Divide Road and the skyline, near the proposed North Transition Station site. The view of CNF has a high visual quality with the only visible deviations being this Forest Adventure Pass parking area along Ortega Highway in the immediate foreground and the South Main Divide Road cutslopes in the middleground. The SIO of the area within the wilderness boundary is Very High, and outside of the wilderness boundary the SIO is High.
