

A **visual simulation** of the LEAPS Transmission-Only Alternative from Key Viewpoint L1 on DePalma Road, a frontage road to I-15, just south of the Indian Truck Trail Interchange. The new transmission line structures and conductors and the Lake Substation would be prominently visible from DePalma Road and I-15, and would introduce additional industrial character into the I-15 corridor. The structures and conductors would introduce high visual contrast and cause moderate view blockage of background sky and distant mountains.
