Please consider Alternative 6

Promote RAPID implementation of
Solar Panels.

Suggest SDG&E be encouraged to
market panels at a profit to SDG&E.
This instead of spending the billion
dollars for the Powerlink.

Please suggest that the Powerlink
& Imperial Valley power plants
will be susceptible to a major
earthquake on the San Andreas
fault. The swarms of earthquakes
around Mexico could well be a
harbinger of the BIG ONE. If we
have solar panels we also have spread
the power supply around the community.

No powerlink; no fires from downed
lines in the earthquake
