PUC HEARING ON SUNRISE POWERLINK

S.D. Co. ADMIN BUILDING 1:30 p.m. 2/25/08

Please support real renewable energy within San Diego. As the EIR shows, transporting electricity over long distances contributes more to greenhouse gases than is saved with solar energy transported by the lines.

The way to increase solar panels on homes and businesses is to give them a better deal for all the power they produce, with a fee going to SDG+E for the use of their lines.

Please choose one of the less environmentally damaging alternatives listed in the DEIR

Respectfully,

Larry Hoque
