Dear Representative,

Transition to renewable sources of energy is imperative. It is imperative that the elected representatives reflect the electorate.

Toyota & Honda, individually sell more autos than any Detroit car manufacturer. AND the Toyota & Honda vehicles get more than (52-60+) miles per gallon!! Detroit would rather furloughs than re-tool.

Numerous individuals with their own hands have built homes that get (20-80+) % of all energy from the sun. These homes are in New Hampshire Rhode Island, Washington as well as the SW Desert States.

The PUC is guaranteed a profit @ our expense. STAY AWAY! Vote against their power line & mandate renewables by 2010!!
