Environmental Impact Report Topic: _____

Comments: _____

I am at this meeting representing my family and friends. They live in all parts of San Diego city and county. We all are concerned for power lines in the back country. Both federal and surrounding areas are one of the few areas of San Diego where the public can enjoy the natural state of our country that many can enjoy.

Also my family's home burned in the Cedar fire. We are afraid the power lines could cause fire hazard due to the hot wires in this area. What about all the eagles and other wild animals that inhabit these areas. Please find a better solution!
