Environmental Impact Report Topic: Loss of <sup>(Park Lands)</sup> Open Space + Fire Danger

Comments: I am a third generation native San Diegan.

My family and I have enjoyed the recreational and natural benefits of San Diego's back country for over 100 years. This project would have a negative impact on Federal, State, County and Local lands. We simply must preserve our open spaces for future generations.

I personally have experienced the 2007 Witch Creek fire which was caused by a down power line. This fire was damaging to personal lives as well as the environment. We do not need this project in Anza Borrego / Santa Ysabel / Ramona. Please explore option #1 in the environmental impact report of developing smart environmental friendly energy options.

Signature JoAnn Bernard Date 2/27/08
