Subject: [#102893] In objection to the Sunrise Powerlink Project (raw)

I am writing to express my objection to the Sunrise Powerlink Project. I have reviewed a number of articles and various materials about this project and the overwhelming conclusion is that this plan is not in the best interests of San Diegans or the environment.

My understanding from researching the subject is that there are several alternatives to this plan, yet SDG&E seems determined to push forward with this highly expensive and highly destructive plan. Public parks and private homes should not be destroyed in the goal of furthering SDG&E's profits. I hope that the CPUC will support the public's best interests and reject SDG&E's plans.

Thank you.

Sincerely,

Andrew Zack
