Subject: Fwd: Sunrise Power Link

March 24, 2008

Dear Sirs:

I protest the plans to place power lines as currently proposed by the Sunrise Powerlink Draft.

The area that I specifically speak to is from the intersection of Highways 76 and 79, and runs seven miles south on Hwy. 79 to Santa Ysabel.

I travel from Vista, CA to Julian regularly on business and pleasure. This is a scenic highway, a route travelled by choice of many residents and visitors for its esthetic beauty. Power lines along the road side would only add to the shrinking areas of natural landscape, and degrade this lovely plateau and hillside.

Along with many others who find open space so valuable, I hope you will reconsider your routing or build power stations further east to accommodate that portion of the state.

Respectfully,

Kaye Van Nevel
