Subject: Fwd: Power Lines!!

I live at 14512 Willow Road in Lakeside and I am very opposed to the proposed power line route behind my property. We already have the ugly site of power lines in this pristine valley. My main concern is the fire hazard. In this valley we are the last ones that get protected if at all. I have my own fire pump system to fight fires because there is no one to rely on to help fight the fires. The fire danger here is very high and I would think the first route would be much more easily monitored than the route behind my property.
