

- A** The **existing view** to the west along SR 78 in Santa Ysabel Valley, just west of Santa Ysabel. The foreground pastoral valley landscape is bordered by low rolling hills to the west. Existing wood-pole utility lines are adjacent to SR 78.
- B** This image presents a **visual simulation** of the Proposed Project spanning SR 78 along the west side of the valley. The transmission lines would appear as prominent linear, vertical features in an otherwise natural appearing landscape.

**Proposed Project**
