

Michael Clayton & Associates

A **visual simulation** of the Partial Underground 230 kV ABDSP SR 78 to S2 Alternative from southbound San Felipe Road (S2). This viewpoint is approximately 0.8 mile south of San Felipe. The view is to the southeast and captures a portion of the route that passes in close proximity to several rural residences in the vicinity of San Felipe. The structures and conductors would be prominently visible from San Felipe Road and adjacent residences and would noticeably contrast with the existing rural landscape character and predominant natural forms and lines.
