

Michael Clayton & Associates

A **visual simulation** of the SWPL Interstate 8 Alternative from Key Viewpoint 55 on Moreno Boulevard, just south of San Vicente Drive. This view to the east-southeast captures the Interstate 8 route as it passes along a ridge east of the community of Moreno. The transmission line would be prominently visible to nearby residences and equestrians, particularly along the foothills at the base of the ridge. Skylining would exacerbate structure prominence and the facilities would introduce structural complexity and industrial character into the landscape.
