

A **visual simulation** of the proposed cable pole (transition structure) adjacent to San Vicente Road, from Key Viewpoint 20 on westbound San Vicente Road. This view is to the northwest toward proposed structure I124. As shown in the simulation, the complex structure would be prominently visible in westbound views and the industrial character of the structure would introduce substantial visual contrast relative to the predominantly rural landscape setting. The structure would also cause noticeable view blockage of the background hills.
