

A **visual simulation** of the SWPL Interstate 8 Alternative from Key Viewpoint 52 on westbound I-8, approximately 1.4 miles north of the Buckman Springs Road on-ramp. This view to the north-northwest captures the I-8 route as it spans the freeway, north of Cottonwood Valley. The structures and conductors would be prominently visible at the span as views are confined to the gap that the freeway passes through. The structures and conductors would introduce structural complexity and industrial character into a landscape not presently exhibiting such characteristics.
