

Michael Clayton & Associates

A **visual simulation** of the BCD South Option, as viewed from Key Viewpoint 79 on La Posta Truck Trail, approximately 0.3 mile north of Sandy Creek Road. This view is to the south-southeast and shows the BCD South Option passing through the shallow valley north of I-8 and the La Posta Road overpass. The route then spans I-8 and ascends the undeveloped ridges south of I-8. The BCD South Option would introduce prominent, structurally complex features with considerable industrial character into predominantly undeveloped and natural appearing landscape.
