

Michael Clayton & Associates

The **existing view** to the south toward the In-Area All Source Generation Miramar Peaker site, from the north side of Miramar Road. The peaker site would be located to the south (behind) the buildings shown in the image above. This viewpoint location was selected because the peaker would not be visible to eastbound or westbound travelers on Miramar Road because of the right angle of view and the screening provided by structures and trees. The surrounding landscape is predominantly commercial and industrial in character.

**Key Viewpoint 75**  
In-Area All Source Generation  
Peaker: Miramar
