**Subject: Addendum No. 1 to Geotechnical Investigation  
Sunrise Powerlink Project  
230 kV Underground  
Alpine, California**

Dear Ms. Frisbie:

Geosyntec Consultants (Geosyntec) respectfully provides the San Diego Gas & Electric Company (SDG&E) this addendum to our report titled "Geotechnical Investigation, Sunrise Powerlink Project, 230 kV Underground, Alpine, California," dated 18 June 2009. We recently reviewed our project file and discovered a sentence that should have been removed when the report was finalized. The sentence is found in Section 5.3 and reads "Additional MFAD design recommendations for the cable pole at the east end of the underground portion of the alignment will be provided in an addendum report following the completion of field explorations at the cable pole location." The sentence should be struck since field exploration at this location had been completed and recommendations had been presented in the final report.

We appreciate the opportunity to provide geotechnical support to the project. If you have any questions or need further assistance, please contact the undersigned at (858) 674-6559.

Sincerely,

Alexander J. Greene, C.E.G. 2249  
Project Engineering Geologist

  
Steven M. Fitzwilliam, G.E. 2501  
Associate, Geotechnical Engineer
