Subject: Sunrise Powerlink Project, Phase I Environmental Site Assessment (ESA), Response to 30 September 2009 Memorandum, Geotechnical Consultants, Inc., Mitigation Measures P-2a, P-7a, HS-APM-5, HS-APM-6, HS-APM-7 and H-7a

Dear Anne:

Geosyntec Consultants (Geosyntec) has reviewed the above referenced memorandum to Aspen Environmental Group prepared by Geotechnical Consultants, Inc. (GTC). The memorandum was prepared to document the receipt, review, and concurrence with the applicability of the Phase I Environmental Site Assessment for the Sunrise Powerlink, Environmentally Superior Southern Route, dated 18 August 2009, prepared by Geosyntec (Sunrise ESA).

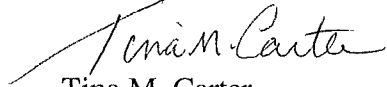

GTC concluded that the Sunrise Powerlink Project ESA is thorough and meets the intent of the applicable California Public Utilities Commission (CPUC) Mitigation Measures. Additionally, GTC concurred with the recommendations contained within the Sunrise Powerlink ESA. However, GTC has recommended that Aspen request copies of the reports documenting the implementation of the recommendations. Therefore, the following documents will be provided to Aspen as they become available:

- Copies of the approved Sampling and Testing Plan (STP) and the subsequent report of findings including laboratory reports will be provided to Aspen.
- Copies of UXO field survey reports or documentation demonstrating that no ground disturbance will occur on or near DOD lands will be provided to Aspen.
- Copies of the report documenting additional site reconnaissance and findings for the Impac Ready Mix site will be provided to Aspen.

- Copies of the Hazardous Waste Contingency Plan and Health and Safety Plan will be provided to Aspen 60 days prior to the start of construction.

After your review, if you have any questions or concerns, please feel free to contact me at the numbers below, or Alan Colton at 858.654.8727.

Sincerely,

Tina M. Carter
