Dear Ms Blanchard & Ms Kastoll

Subject - Powerlink Route "D" Alternate

The Campo area already has one major power elec line. Our community doesn't need the second proposed Route D power line going through our residential neighbor hoods. Two major power lines this close together will cause big problems if there is a disaster in the Campo area. For better reliability these type of major power lines should be many, many miles apart. Not a few miles

The proposed Route D alternate route map shows this line to be put through Cameron Valley. This is a historic Campo Valley which was named MOTIQUWHAT by native Indians long before European settlers came to Campo. It was a major Indian camp and Indian hunting area. Many Indian artifacts are found in this Valley.

Sincerely Bob Shea
