

Dear Susan Lee,

I am writing this letter in a strong voice of objection regard the proposed Sunrise Powerlink Modified Route D Alternative in the Back Country.

We are deeply disturbed by this proposal, and how it will affect our communities and the environment that we live in. Most of the residents that live in the Back Country make a huge sacrifice to live out here. We are not a wealthy community as are some other mountain communities. We commute many miles to work and spend a lot of money on gas to be able to live in these beautiful mountains, to live in healthy clean air, to live in the peaceful quiet, and to enjoy the nature that is all around us.

Please do not let this proposal destroy the reason we choose to live here. How would you feel if you had these huge noisy, ugly towers in your front or backyard, scarring your land and running through your neighborhood? How would you react if you had a 150-foot tower of 500 kilovolts of electricity on your property, or of that to your family and friends knowing that it could be putting their very lives in danger, causing all kinds of life threatening illnesses?

Is human life, even one human life so worthless to Sempra Energy? What kind of impact would this have on the already stressed territory of the balance of nature? What about the extreme fire dangers that the Back Country battles every year? How can this proposal by-pass the Federal Offense Laws of disturbing the many historical ancient Indian Villages and artifacts that we have through out our communities?

These are just a few alarming concerns. We believe that the negative impact of this proposal far out weigh any positives, and we believe that you would agree if this proposal was intended to be on your property and in your community.

Is it really necessary to import electricity from another county? There has got to be a better solution.

We urge you to please help protect our land and homes, to protect the national treasure of the Back Country, and to protect the health of many people by rejecting the modified Route D Alternative. Thank you,

Sincerely,
David and Kelly Mory
