

Michael Clayton & Associates

A **visual simulation** of a monopole design from Key Viewpoint 1 near the entrance to Florence Joyner Olympiad Park, just south of the proposed Tower HF-03 location. This view is to the northeast toward proposed tower locations HF-03 (closest), -04, and -05. As shown in the simulation, the monopole design would have a single but more massive support pole and would be approximately 16 feet taller than the proposed H-frame structure. However, the monopole would appear more similar in design to the existing single-pole towers.
