Now is the time to prepare for the future. Increased power will surely be needed by this community and others that will be built further up the mountains. It now is time to bury the past as well as the future hurtful but necessary conduits of expansion. Our forefathers were thoughtful enough to bury the water, gas and sewage pipes and now we have an opportunity yea an obligation to bury power lines also. We need to keep and improve our beautiful part of the world.

32-1

- 32-1 Thank you for sharing your concerns regarding the proposed project. Please see General Response GR-3 regarding the undergrounding of existing and proposed electrical transmission lines, as well as Appendix 8, which discusses various route options considered by the CPUC.
