Subject: Edison request to add above ground towers Viejo Systems Project

March 16, 2004

To whom it may concern.

Re: Viejo System Project
Southern Cal Edison request to add 66 KVA lines, and new towers, in the northeastern section of the city of Mission Viejo.

As we live within a few hundred yards of the towers in Florence Joyner Park we hereby demand that any additional service, if necessary, be provided by burying said lines. Buried lines already exist at the Chiquita Substation. This is documented by the provision of service to the city of Rancho Santa Marguerita from this same station that is located at the corner of Alicia Parkway and Olympiad Road. Those lines, going east under Alicia Parkway, were placed underground. We demand the same alternative methods be used for any additional lines/service in this area.

Respectfully submitted,

Lawrence and Carolyn Gilbert
28302 San Marcos, Mission Viejo, CA 92692 Tel 949.581.8688
email lgpwr@aol.com

Note: Being out of state during the Mission Viejo CPUC Pre Hearing of the 25th we will not be able to express our concerns in person to the Judge. Please consider this to be our written statement of opposition to any above ground additions or modifications.

Thank you.

37-1

37-1 Thank you for providing your opinion. Please see General Response GR-3 for information regarding the undergrounding of electrical transmission lines, as well as Appendix 8, which discusses various route options considered by the CPUC.
