Subject: Proposed Edison/Mission Viejo Project

I urge you to support any expansion of the Edison utilities through Mission Viejo only if all lines are buried underground. Above ground utility conduits are in conflict with the promised amenities of the Mission Viejo area. To support above ground utilities is to enable developers to renege on the overall plan for the area. Regardless of claims to the contrary, these additional lines will not benefit Mission Viejo, they are for the benefit of housing development further inland from MV. MV should not have to pay a price to facilitate housing in another area.

Clay Renfro
Mission Viejo

- 49-1 Thank you for providing your opinion. Please see General Response GR-3 for information regarding the undergrounding of electrical transmission lines, as well as Appendix 8, which discusses various route options considered by the CPUC.
