Subject: new lines

I am writing to let you know that I completely oppose the addition of new overhead power lines in Mission Viejo. It is utterly ridiculous that in this day and age, it would even be considered that more lines and poles be added when they can be installed underground. Why ruin a prestigious and beautiful lakefront community with lines that absolutely do not need to be installed above ground? It is highly important that Edison not be allowed to take the easiest, cheapest, shortcut available at the expense of the residents of Mission Viejo. We have supported, built and maintained this community for years, and should not have to pay the price for Edison's impropriety. Thank you. Hope Conley

53-1 Thank you for sharing your concerns. Please see General Response GR-3 for information regarding the undergrounding of electrical transmission lines, as well as Appendix 8, which discusses various route options considered by the CPUC.
