

This image presents a **Visual Simulation** of the Proposed Project from **KOP 13**, on **Haugen-Lehman Way**, just south of Amethyst Drive, in the residential community of Whitewater. This simulation illustrates the replacement of three existing transmission lines of different design and size, with two transmission lines of greater height but identical design. As shown in the simulation, the new structures would be somewhat more prominent due to greater heights and greater structural design complexity (lattice vs. pole).
