DATA REQUEST SET A.13-10-020 WODUP ED-SCE-08

To: ENERGY DIVISION
Prepared by: Patty Nevins
Title: Environmental Coordinator
Dated: 10/14/2014

Question REC-3 B:

Park Closures. The PEA section on Recreation (Section 4.15.4.2, NEPA Impact Assessment) states that “Construction of the 220 kV transmission lines and related ancillary facilities... could directly and indirectly impact recreational uses in certain areas. For example, trails (such as the Pacific Crest Trail and SCE Corridor Trail Class I Path), parks (such as Noble Creek Regional Park, Stetson Community Park, and Oak Valley Park) and private recreation facilities (such as private golf courses, campgrounds, equestrian facilities, and private parks) transect the WOD corridor and could be temporarily affected by construction activities. During the construction period, recreational users would not be allowed access to the existing recreational areas located within the existing WOD corridor.

B. Please explain whether SCE anticipates any closures of the Pacific Crest Trail where it is located within the existing WOD corridor and if so, what the duration of such closures would be.

Response to Question REC-3 B:

Please see attachment included in SCE's response to Question No. REC-3 A. As noted in that attachment, the need for closure of the Pacific Crest Trail is expected to be intermittent with a total cumulative duration estimated to be no more than 72 hours.
