This image presents a **Visual Simulation** of a portion of the Proposed SB-Redlands-Tennessee overhead 66 kV subtransmission line, from **KOP 18** on **Iowa Street**, in the City of Redlands. The simulation illustrates the introduction of vertically prominent, light-weight steel poles into the suburban landscape along Iowa Street. As shown in the simulation, the new structures would be visually dominant features in views from Iowa Street and the adjacent Cottage Lane residential subdivision.
