Subject: San Diego Gas & Electric Company – Master Special Use Permit and Permit to Construct Power Line Replacement Projects, Amended PTC Application No. 12-10-009—Completeness Review

Dear Ms. Giles:

The Energy Division of the California Public Utilities Commission (CPUC) has completed its review of San Diego Gas & Electric's Application (A.12-10-009) for a Permit to Construct the Master Special Use Permit - Power Line Replacement Projects submitted on October 17, 2012 and amended on June 26, 2013. The CPUC's Information and Criteria List and working Draft Preliminary Environmental Assessment (PEA) Checklist for Transmission Line and Substation Projects were used as a basis for evaluating completeness and ensuring that sufficient information is available so that the CPUC can conduct environmental analysis required by the California Environmental Quality Act (CEQA). The CPUC has determined the subject Application contains sufficient information to satisfy these requirements and can be deemed complete.

Please note that this determination has been made with the understanding that the CPUC may request additional data, as necessary, to review and analyze the environmental effects of the proposed project in accordance with CEQA requirements.

If you have any questions or need additional information, please contact me at 415.703.1966 or lob@cpuc.ca.

Sincerely,

A handwritten signature in black ink, appearing to read 'Lisa Orsaba'.

Lisa Orsaba, Project Manager
Energy Division
California Public Utilities Commission
