Subject: *Minor Project Refinement Request (MPRR) #13—Pole Shift on Circuit 442--
Cleveland National Forest Power Line Replacement Projects (Application No.
12-10-009)*

Dear Ms. Reynolds:

On February 7, 2018, San Diego Gas & Electric (SDG&E) submitted Minor Project Refinement Request (MPRR) #13 to the California Public Utilities Commission (CPUC), to modify components of Circuit (C) 442 as described in the MPRR. In summary, SDG&E requested the following project refinements:

- A request to shift Pole P178040 (a new steel pole) on C442 approximately 15 feet north of its approved location, and expand the temporary pole work area associated with Pole P178040 by less than 0.01 acre. The pole and temporary pole work area will be accessed using an existing, approved construction-only access road. Vegetation clearing will be required for use of the temporary pole work area. The activities associated with the installation of the pole will be consistent with the project description provided in the Final Environmental Impact Report/Environmental Impact Statement (EIR/EIS).

The CPUC voted on May 26, 2016 to approve the Cleveland National Forest Power Line Replacement Projects (Decision 16-05-038) and a Notice of Determination was submitted to the State Clearinghouse (SCH#2013091070).

The Commission decision approving the Permit to Construct (PTC) authorizes Energy Division staff to approve requests by SDG&E for minor project refinements. The decision states that minor project refinements that may be necessary due to final engineering of the project may be approved so long as such minor project refinements are located within the geographic boundary of the study area of the EIR/EIS and do not, without mitigation, result in a new significant impact or a substantial increase in the severity of a previously identified significant impact based on the criteria used in the EIR/EIS; conflict with any mitigation measure or applicable law or policy; or trigger an additional permit requirement.

This letter documents the CPUC's thorough evaluation of all activities covered in MPRR #13 and that the changes requested in MPRR #13 are allowed pursuant to the Commission decision issuing the PTC. In accordance with the Mitigation Monitoring, Compliance, and Reporting Program, MPRR #13 was reviewed by CPUC to confirm that no new impacts or increase in impact severity would result from the requested activities.

Ms. Kirstie Reynolds
