RE: Pacific Gas and Electric Company Martin Substation Extension / Egbert Switching Station Project (A. 17-12-021) Response to California Public Utilities Commission Application Data Request No. 6

Dear Mr. Chiang:

This letter is in reply to your July 29, 2019 letter in which you request certain additional information regarding Pacific Gas and Electric Company's (PG&E's) application (A.17-12-021) for a Certificate for Public Convenience and Necessity for the Egbert Switching Station Project (project). The original text of the data request from the California Public Utilities Commission (CPUC) is included, followed by PG&E's response.

One attachment to this letter is provided to support PG&E's response:

Attachment 1 Limited Phase II Site Investigation, 1755 Egbert Avenue (2016)

CPUC Data Request – Written results of the soil, groundwater and soil vapor sampling

Please provide responses to the following:

Written results of the soil, groundwater, and soil vapor sampling. The subsurface investigation report shall document sampling locations, sampling protocol, and laboratory analyses conducted on the samples, including testing for the complete list of analytes required by the Maher Ordinance, as well as radiological analysis. If existing data is available from other previous sources, this information should be included as well. While the final Site Mitigation Plan (SMP) can be provided to CPUC at a later date for review and approval prior to any construction activities, draft results per this Data Request No. 6 must be provided to be included in the Draft EIR prior to its release for public review. This information is pertinent to all affected areas of the alignment, including on and in the vicinity of the proposed Egbert Switching Station site.

PG&E's Response

Provided as Attachment 1, please find the Limited Phase II Site Investigation for 1755 Egbert Avenue in San Francisco, California (Environmental Resources Management, 2016).
