***Subject: Project Completeness Review –
PG&E (U 39 E) South of Palermo Project (Application No. A.16-04-023)***

Dear Ms. Blanchard,

California Public Utility Commission (CPUC) has reviewed the Proponent's Environmental Assessment (PEA) dated April 2016, and the subsequent responses to data requests. The CPUC's Information and Criteria List and PEA Checklist were used as a basis for evaluating completeness and ensuring that the CPUC can complete environmental review of the proposed project as required by the California Environmental Quality Act (CEQA). Based on review of all information provided, CPUC finds that the PEA and subsequent data requests are sufficiently complete to enable CPUC to independently analyze the environmental effects of this project.

The CPUC and its consultant reserve the ability to ask further clarifying questions as the environmental review proceeds. PG&E's response will be important in providing an accurate analysis of the project for CEQA purposes.

If you have any questions regarding this letter or need additional information, please contact me at (415) 703-2579.

Sincerely,

Andrew Barnsdale
Project Manager
