I am writing this statement as a show of support for the Tule wind project. ~~If~~ reduction in numbers of turbines and realignment and redesign of ~~the~~ high voltage line be placed underground will reduce environmental impacts than jets chose and alternative of which can accommodate all concerns and also hire and have staff ~~archeological~~ quarters during all ground disturbance and have a survey plan in place in case something is ~~the~~ discovered.

This project will provide employment for the local community and also provide green energy for all on the grid.
