I am broadly in favor of wind power development in East San Diego County. It makes sense to develop wind resources where the WIND IS. It is like making lemonade out of lemons.

I look forward to learning more details of the Tule Wind project so I can comment more specifically.

Local sources of power creates energy security for our region & nation.

I encourage fact based dialog & further discussion. I would also like to encourage renewable energy seminars\* & public discussion so benefits & pitfalls can be further examined.

Don't curse the darkness; light a candle.

Don't curse the wind; harvest the power!
