

12-23-10

Dear Lain Fisher & Greg Thomsen:

Re. the Tule Wind Project -  
I'm writing to you since you're on  
the big picture teams. The CPUC  
& BLM has the total (global view)  
in its sight when deciding on  
local projects such as this.  
I urge you to support this  
renewable, non-fossil fuel based  
power generation project because  
we must reduce CO<sub>2</sub> concentration  
by 80% if we're to have any  
chance of survival past 2100.

Please keep the big picture in  
mind & support all technologies  
with that goal uppermost.

A carbon fee & dividend energy  
policy would provide the essential  
market-based solution to get  
us all rowing together without  
undue taxpayer burden. Thanks  
Gratefully, Dadla Ponizil
