DATA REQUEST SET A.15-03-003 ED-SCE-01

To: ENERGY DIVISION
Prepared by: Jason Carson
Title: Project Manager
Dated: 05/22/2015

Question Q.13:

Construction Routes and Staging Areas

Confirm that the existing roadway network defined in 4.16.1.1 includes access to the staging areas defined in 3.7.1.1. If not, define the probable routes that will be used for access to the staging areas and material delivery from the staging areas to the construction sites.

Response to Question Q.13:

The road network described in PEA Section 4.16.1.1 does include access to the staging areas defined in PEA Section 3.7.1.1. However, for use of the Corvette Street staging area and the replacement of an existing lattice steel tower on the Goodrich-Laguna Bell 220 kV transmission line, the project also anticipates using Flotilla Street – Cross street Garfield Avenue.
