RE: SUPPORT - South Orange County Electrical Reliability Enhancement (SOCRE) by San Diego Gas & Electric (SDG&E)

As a REALTOR® in South Orange County, I want to express my strong support for the San Diego Gas & Electric (SDG&E) South Orange County Reliability Enhancement (SOCRE) project. Prospective new home buyers often ask about issues such as schools, traffic and other infrastructure needs. Electric reliability rarely comes up because the expectation is that safe and reliable power is assumed to be addressed and maintained.

Therefore, I was concerned to learn that the California Public Utilities Commission (CPUC) staff has not recommended SDG&E's project as proposed. Electric reliability is the primary purpose of this project, the few temporary environmental impacts found during the construction phase of this project is no reason to abandon a good plan for an alternative that either won't improve reliability or one that may not be feasible to build.

I support the upgrade proposed by SDG&E, which will provide a redundant electrical transmission system and ensures safe and reliable power to the entire South County region.

Please approve the SDG&E SOCRE project to enhance reliable power for the next generation.

Sincerely,

A handwritten signature in cursive script, appearing to read "Bruce Kobayashi". The signature is written in black ink on a white background.

Electric reliability rarely comes up because the expectation is that safe and reliable power is assumed to be addressed and maintained.

Therefore, I was concerned to learn that the California Public Utilities Commission (CPUC) staff has not recommended SDG&E's project as proposed. Electric reliability is the primary purpose of this project, the few temporary environmental impacts found during the construction phase of this project is no reason to abandon a good plan for an alternative that either won't improve reliability or one that may not be feasible to build.

I support the upgrade proposed by SDG&E, which will provide a redundant electrical transmission system and ensures safe and reliable power to the entire South County region.

Please approve the SDG&E SOCRE project to enhance reliable power for the next generation.

Sincerely,

26875 Calle Hermosa, Suite 11

RE: SUPPORT - South Orange County Electrical Reliability Enhancement (SOCRE) by San Diego Gas & Electric (SDG&E)

As a REALTOR® in South Orange County, I want to express my strong support for the San Diego Gas & Electric (SDG&E) South Orange County Reliability Enhancement (SOCRE) project. Prospective new home buyers often ask about issues such as schools, traffic and other infrastructure needs. Electric reliability rarely comes up because the expectation is that safe and reliable power is assumed to be addressed and maintained.

Therefore, I was concerned to learn that the California Public Utilities Commission (CPUC) staff has not recommended SDG&E's project as proposed. Electric reliability is the primary purpose of this project, the few temporary environmental impacts found during the construction phase of this project is no reason to abandon a good plan for an alternative that either won't improve reliability or one that may not be feasible to build.
