Hello Mr. Williams,

I am from Assemblyman Cunningham's office in district 35.

We had a few constituents contact our office in regards to the Estrella Substation Project.

Our office was wondering if the CPUC received PG&E's CEQA study regarding this area. We were also wondering why this location was originally off PG&E's list of possible location but, it is back on the possible sites for the CPUC.

Here are a few of the reasons the constituents are concerned about this site.

1. Fault lines
2. Fire Severity
3. Loss of Heritage Oaks
4. Safety Concerns for proximity to homes

Thank you in advance for any clarification on this matter.

Keilah Smith

District Director

Assemblyman Jordan Cunningham
